

Come Face to Face With Natural History at Rocky Mountain Dinosaur

We welcome you to the Rocky Mountain Dinosaur Resource Center's school tour. The tour is designed to help students and adults learn the basic fundamentals of paleontology. After completing the tour, students should have a general understanding of the following topics: geologic time, process of fossilization, basic dinosaur anatomy, basic dinosaur knowledge, basic fieldwork, and basic lab work.

We hope your students learn a great deal about this wonderful science and have fun along the way. To help with this goal, **we ask that teachers be responsible for the behavior of their group, stay with the group at all times, and review the museum rules with your students prior to the tour.** It will take approximately 2 hours for the tour and museum exploration. **For younger students, you may need to let them have a snack prior to your arrival at the museum, as there is not time for a snack break during the tour.** We have updated our website, www.rmdrc.com, to include downloadable fun and educational activities that you can use in your classroom. We look forward to your visit.

About Rocky Mountain Dinosaur Resource Center:

Rocky Mountain Dinosaur Resource Center was founded on Memorial Day of 2004. One of our principal missions is to help educate the public about the wonderful world of the dinosaurs. The museum is privately funded and privately staffed. Unlike other facilities, each year we intend to modify our existing exhibits, so that the museum visitor has a fresh and new experience each time they visit. Throughout the year we have many special events and guest lecturers, including some of the top minds in the field.

We have membership programs and custom tailored educational activities.. We also have a top notch gift shop where educational materials and gifts can be purchased. The RMDRC's parent company is Triebold Paleontology Inc.(TPI).TPI is known the world over for our exciting discoveries, traveling exhibits, and museum quality cast fossil specimens.We have over 15 years of field and laboratory experience. Please visit our websites, www.rmdrc.com and www.trieboldpaleontology.com to learn more about our exciting work.

Museum Rules:

- * **No running in the museum**
- * **No climbing on the exhibits**
- * **Touch only the hands-on exhibits and specimens**
- * **Raise your hand when you have a question**
- * **No eating or drinking in the museum**
- * **An adult must accompany the students to the restrooms and Gift Shop**
